

### Instructions

**Safety:** You will need scissors and paper fasteners to complete this puppet of Shift. When using scissors and paper fasteners be careful to use them correctly and get an adult to help.

### You will need:

- 1 X  Scissors
- 5 X  Fastener pins
- And a selection of colouring pencils

### Stage 1

Colour Shift in, pencils will be better for this job as felt tips will make the paper wet and not as durable when pinning together.

### Stage 2

Once coloured in, cut Shift out using the scissors. Be careful not to injure yourself when using the scissors. Follow all the dashed lines until all 6 parts are free from the paper.

### Stage 3

Pin Shift together by lining up the letters, and pushing the paper fastener pins through the centre of the letter. Once the pin is pushed through, peel the pin in half and bend into position. Shift's head will start at the bottom with the body on top. Then pin Shift's arms and legs on top of the body by matching up the letters.
